## ABOUT US

Nick Leghorn has 15+ years of experience in information security and application development. He has built and operated risk-based, audit-compliant security programs for multiple companies across various industries.

Previous experience includes: New York Times, Indeed, Mitel, Rackspace Hosting

## EXPERTISE

- SOC2, PCI, HIPAA, GDPR, SOX, NIST CSF, ISO 27001
- Cloud Environment Architecture, Configuration, and Security (GCP, Azure, AWS)
- Secure Application Design and Development
- Risk Assessment and Management
- Security Program Design and Implementation
- Policy Development and Creation
- Incident Response, Investigation, and Remediation

## WHAT WE OFFER

### GET A SECURITY “SANITY CHECK”

Whether you are a newer company that is just getting started or an established company looking for some help, an outside opinion from an industry expert can be useful to **identify any areas for improvement** or potential roadblocks.

Leghorn Consulting can quickly **review your security posture** to advise how you compare relative to industry standards, provide **suggestions for improvements** where necessary, and **help you implement** those that make sense for your business.

### BUILD YOUR SECURITY ROADMAP

There's so much to do to properly secure a business that even finding the starting point can seem overwhelming. That's where Leghorn Consulting can help, by **building a risk-based information security program** and **laying out the roadmap** for your company to follow.

Ensure that you are maximizing the return on investment for each dollar spent securing the company, and that you can track and monitor the effectiveness of those programs.

### BE PREPARED FOR THE AUDITORS

For some businesses, **audits and attestations aren't optional**. And those periodic examinations can be painful experiences filled with unexpected findings and deficiencies.

Leghorn Consulting has helped companies **gain and maintain compliance** with multiple frameworks, including SOC2, HIPAA, PCI, and SOX among others. We can help implement policies and procedures that let you **sail through your audit with ease** while minimizing business impact.
